

## Windows 10 Wireless Instructions

1. Click on the Start icon at the bottom left

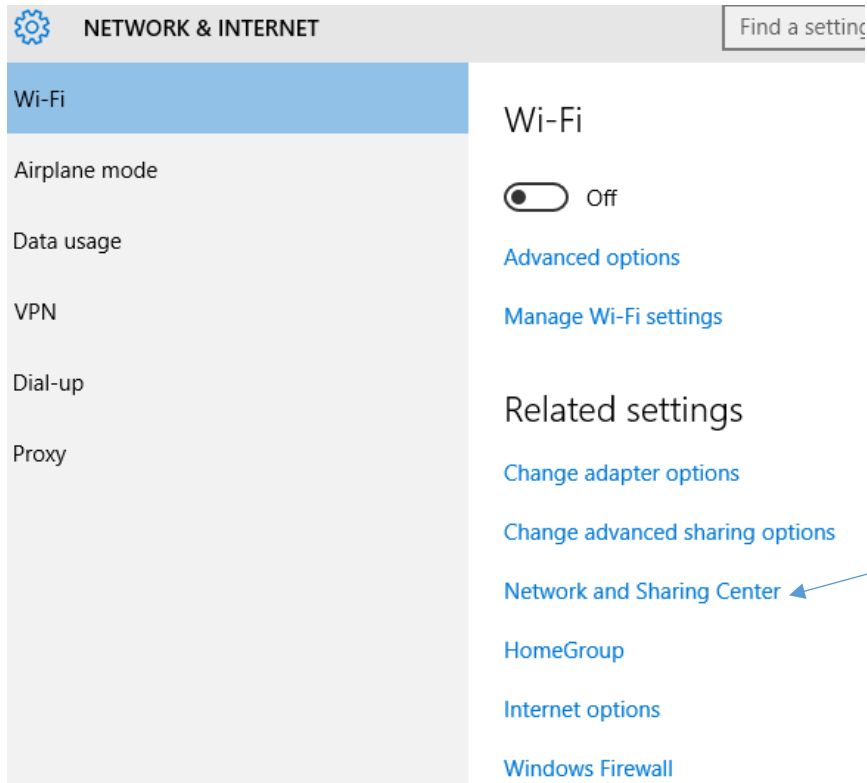

2. Click on Settings

3. Click on Network and Internet

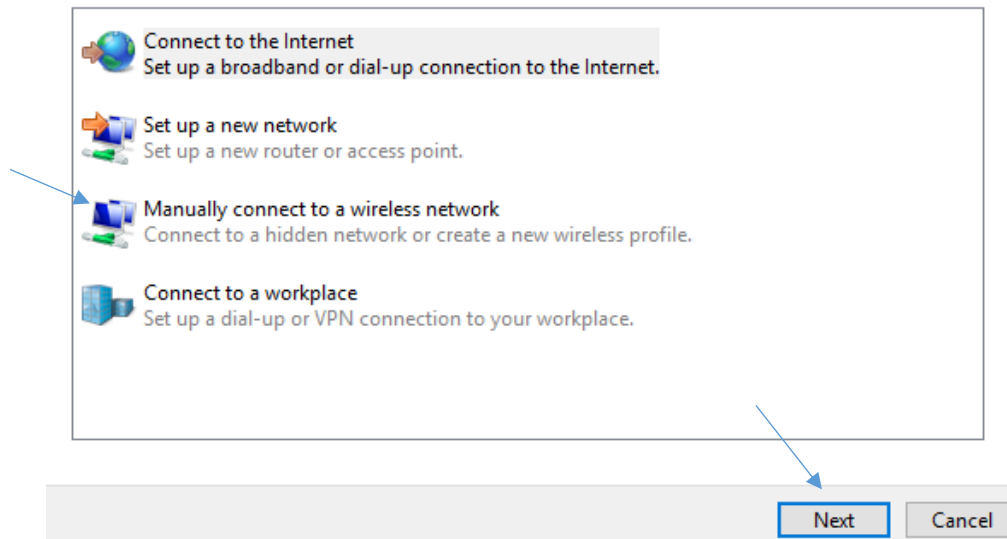

4. Click on Network and Sharing Center on the bottom right

5. Click on Setup a New Connection or Network

6. Click on Manually Connect to a Wireless Network and click Next  
[Choose a connection option](#)

7. Enter the following information:

Network Name: MCC-Wireless

Security type: WPA2-Enterprise

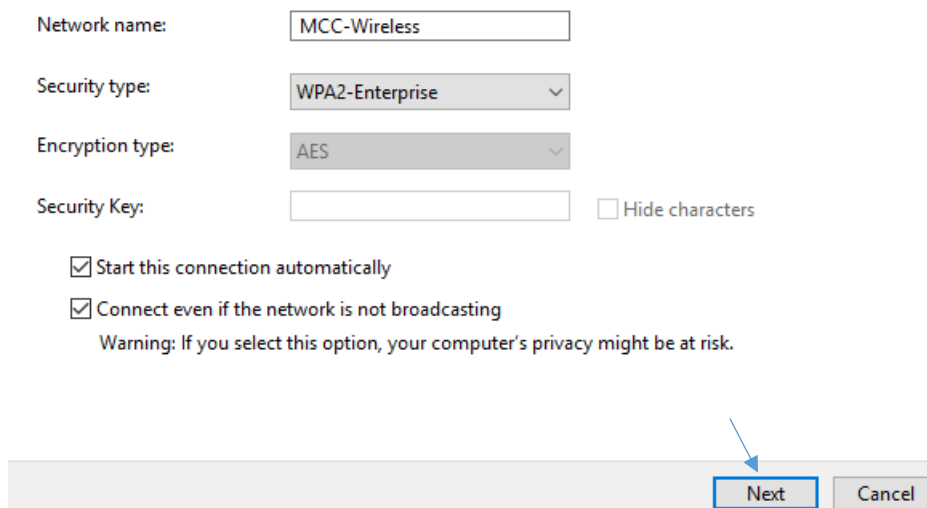

Encryption type: AES

Check: Start this connection automatically

Check: Connect even if the network is not broadcasting

Click on Next

[Enter information for the wireless network you want to add](#)

8. Click on Change Connection Settings

←  Manually connect to a wireless network

Successfully added MCC-Wireless

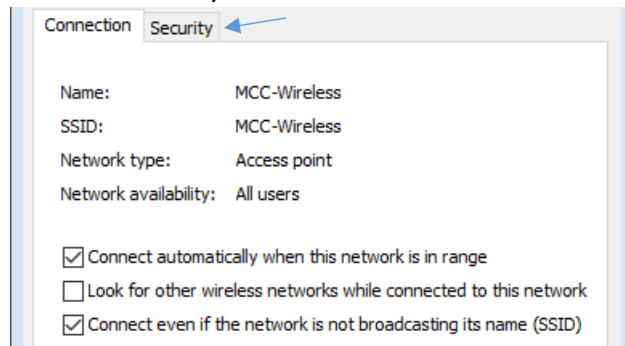

→ Change connection settings  
Open the connection properties so that I can change the settings.

9. Check on the following two options:

Connect automatically when this network is in range

Connect even if the network is not broadcasting its name (SSID)

Click on Security

10. Check that you have the following settings:

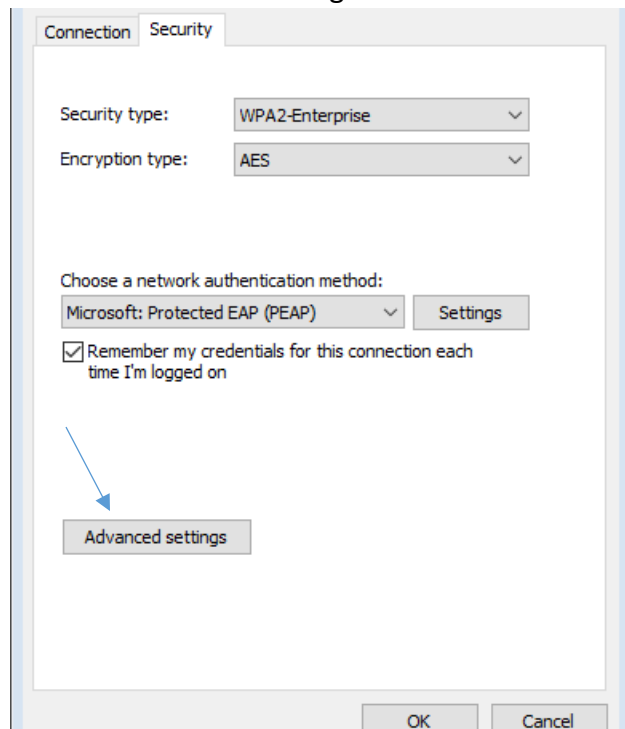

Security type: WPA2-Enterprise

Encryption type: AES

Choose a network authentication method: Microsoft Protected EAP (PEAP)

Check: Remember my credentials for this connection each time I'm logged on

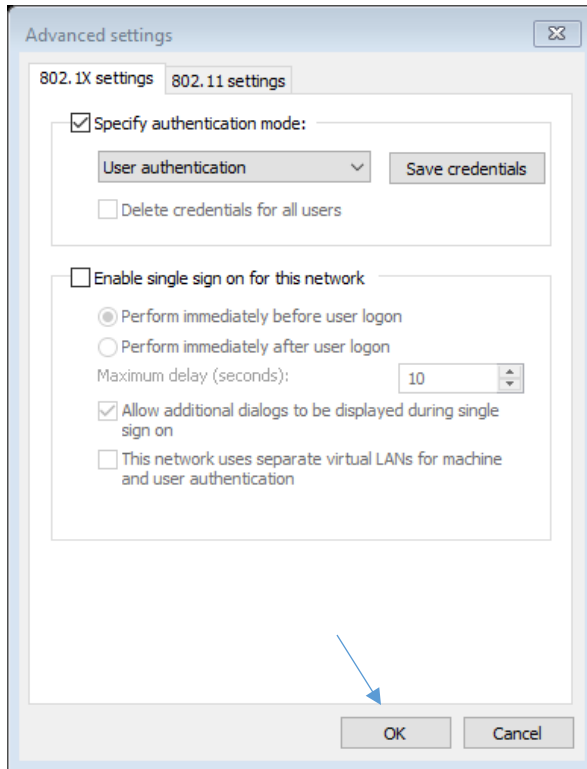

Click on Advanced Settings

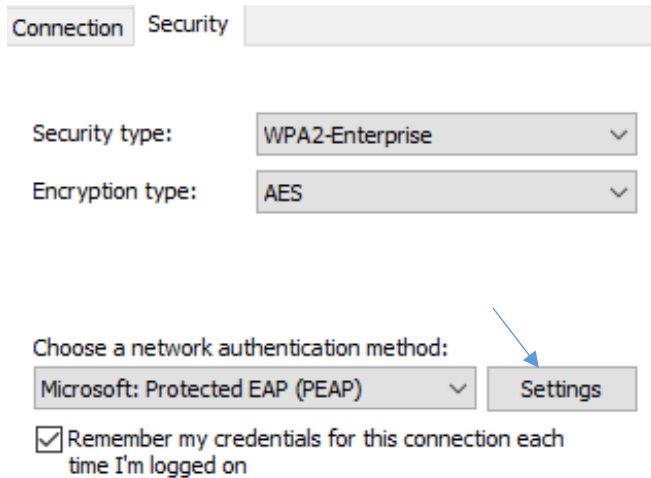

## 11. Check: Specify authentication mode

In the drop down below Specify authentication mode change it to User Authentication

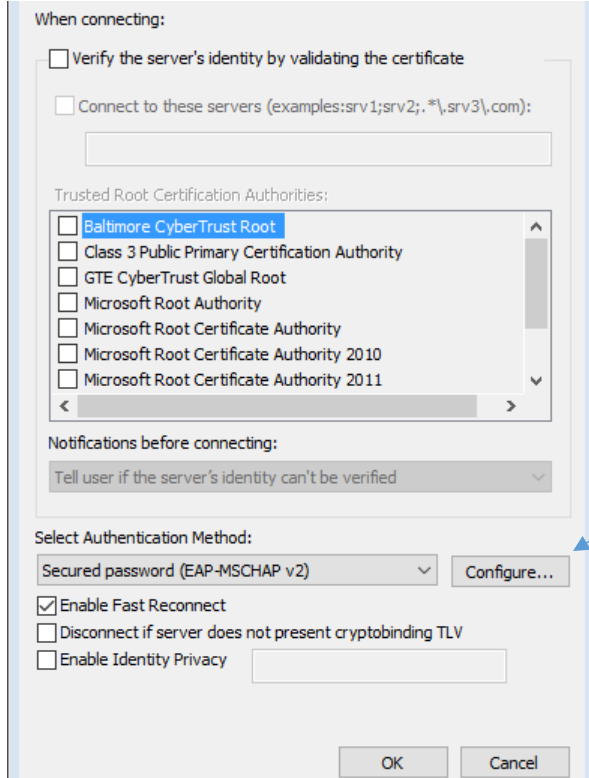

Click on OK

## 12. Click on Settings across from Microsoft Protected EAP (PEAP)

13. Uncheck: Verify the server's identity by validating the certificate  
Select Authentication Method: Secured password (EAP-MSCHAP v2)  
Check: Enable Fast Reconnect  
Click on Configure ...

14. Uncheck: Automatically use my Windows logon name and password (and domain if any).  
Click on OK

15. We should be ready to login to the wireless. Close all wireless settings windows.

16. Click on the network icon at the bottom right of your screen.

17. Click on Wi-Fi

18. Click on MCC-Wireless

19. Check: Connect Automatically  
Click on Connect

20. Enter your username and password

21. You should now be connected and your wireless icon should change to this icon.

## Troubleshooting

1. Click on the Start icon at the bottom left

2. Click on Settings

3. Click on Network and Internet

4. Scroll down and click on Manage Wi-Fi Settings

[Manage Wi-Fi settings](#)

5. Scroll down till you see Manage known networks. Now click on MCC-Wireless.

Manage known networks

6. Then click on Forget

Manage known networks

7. If you have MCC-Guest or MCC-Wireless-Help under Manage known networks make sure to click on them as well and then click on Forget.
8. Now, try the Windows 10 Wireless Instructions again and you should be able to connect. If you have any issues, please call 816-604-1000 option 3 if you are a student or call 816-604-1888 if you are an employee.
